Análisis de la representación femenina en los guiones
ganadores del Óscar (2000–2025)

"En las últimas décadas, la sociedad ha experimentado importantes transformaciones en torno a la igualdad de género. En este contexto, los movimientos feministas han contribuido a situar la representación de las mujeres en el centro del debate público. Esta evolución también ha influido en la industria cinematográfica, **tanto delante como detrás de las cámaras.**"

Mejor película

Es la categoría de mayor visibilidad y prestigio simbólico: representa lo que la industria valida como el estándar narrativo de excelencia en cada año.

Premios de mejor creación narrativa, adaptada o no.

Mejor guion adaptado

Mejor guion original

En conjunto, las tres categorías te dan un corpus triangulado: el reconocimiento institucional más amplio (Película) y los dos mecanismos de escritura que determinan directamente cómo se construye el discurso narrativo (diálogos, arcos, voz) — permitiendo capturar tanto el "qué se premia" como el "cómo se escribe".

EXTERIOR – EDIFICIO - DÍA

VOZ:

Ventura!

VENTURA:

Sí, ¿Satanás?

Ventura se da la vuelta y se encuentra con Shickadance.

VENTURA (Cont'd):

Perdona, señor. (Con un tono de burla) Sonabas como otra persona.

VOZ:

Ventura!

VENTURA:

Sí, ¿Satanás?

VENTURA (Cont'd):

Perdona, señor. (Con un tono de burla) Sonabas como otra persona.

SHICKADANCE:

Ventura!

VENTURA:

Sí, ¿Satanás?

VENTURA:

Perdona, señor. Sonabas como otra persona.

SHICKADANCE:

Ventura!

VENTURA:

Sí, ¿Satanás?

VENTURA:

Perdona, señor. Sonabas como otra persona.

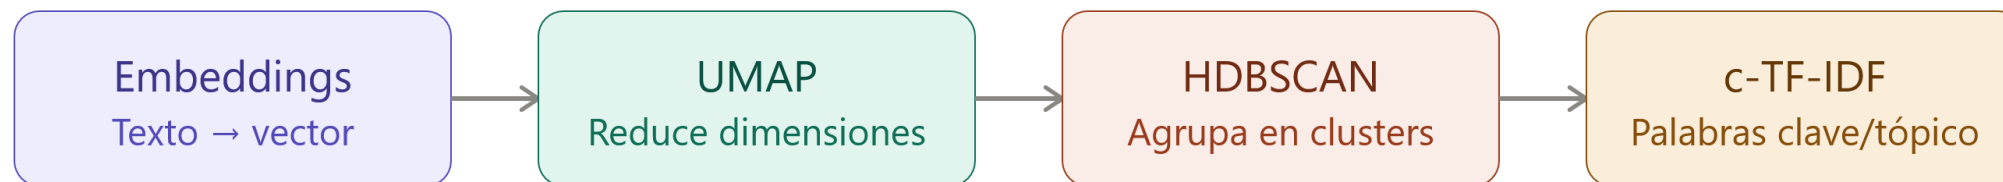

... Y ESO CON 29.000 LÍNEAS DE DIÁLOGO.

Topic Modelling: **BERT**

- Descubre automáticamente qué "temas" o "tópicos" hay en ellos, sin que tú se lo digas de antemano.

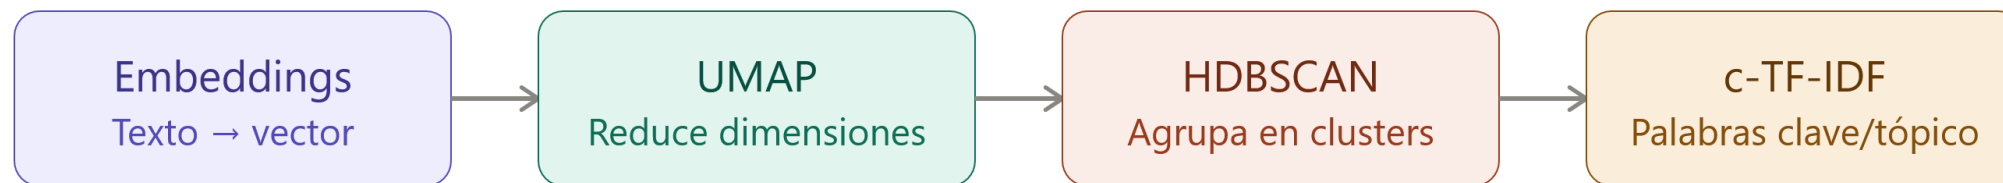

Topic Modelling: **BERT**

- Descubre automáticamente qué "temas" o "tópicos" hay en ellos, sin que tú se lo digas de antemano.

Topic Modelling: **BERT**

- Descubre automáticamente qué "temas" o "tópicos" hay en ellos, sin que tú se lo digas de antemano.

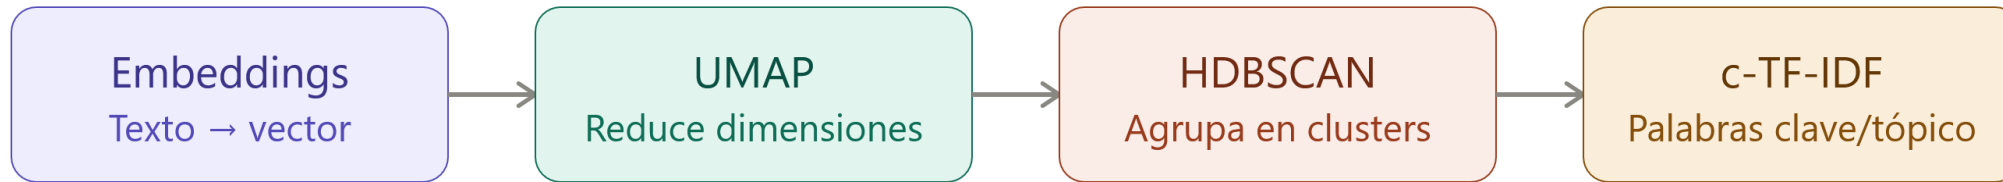

Por ejemplo, la palabra "banco" en:

"Me senté en el banco del parque"

"Fui al banco a sacar dinero"

Topic Modelling: **BERT**

- Descubre automáticamente qué "temas" o "tópicos" hay en ellos, sin que tú se lo digas de antemano.

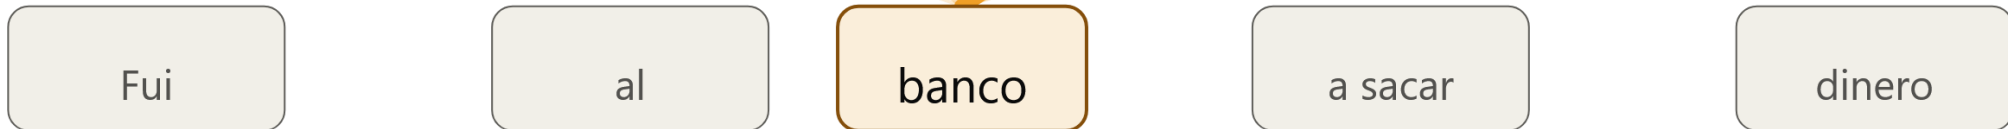

Por ejemplo, la palabra "banco" en:

"Me senté en el banco del parque"

"Fui al banco a sacar dinero"

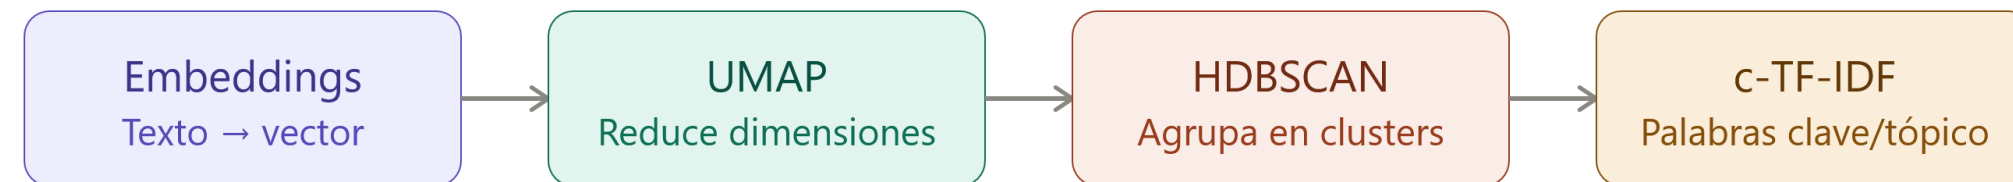

- BERT usa un mecanismo llamado **attention**: para entender el significado de una palabra, la compara con todas las demás palabras de la frase, y decide cuánto "peso" darle a cada una.

grosor de línea = peso de atención hacia "banco"

Topic Modelling: **BERT**

- Descubre automáticamente qué "temas" o "tópicos" hay en ellos, sin que tú se lo digas de antemano.

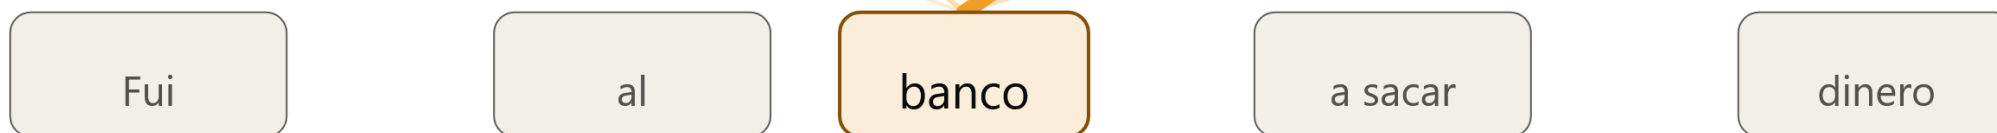

Por ejemplo

"Me senté

"Fui al ban

En este ejemplo, "banco" presta mucha atención a "sacar" y "dinero" — por eso el vector resultante se "inclina" hacia el significado financiero, y no hacia el de "asiento del parque".

- BERT usa un mecanismo llamado **attention**: para entender el significado de una palabra, la compara con todas las demás palabras de la frase, y decide cuánto "peso" darle a cada una.

grosor de línea = peso de atención hacia "banco"

Topic Modelling: **BERT**

“Tengo que cuidar de mis hijos“

"no puedo abandonar a mi familia"

BERTOPIC LAS AGRUPARÁ EN EL MISMO TÓPICO — AUNQUE NO COMPARTAN NI UNA SOLA PALABRA

Topic Modelling: **BERT**

“Tengo que cuidar de mis hijos”

"no puedo abandonar a mi familia"

BERTOPIC LAS AGRUPARÁ EN EL MISMO TÓPICO — AUNQUE NO COMPARTAN NI UNA SOLA PALABRA

Bertopic te retorna cosas así:

Tópico -1: (los que no encajan claramente en ningún grupo — "ruido")

Tópico 0: *"amor, corazón, siempre, juntos"*

Tópico 1: *"trabajo, jefe, oficina, decisión"*

Tópico 2: *"hijos, casa, cuidar, familia"*

Topic Modelling: **BERT**

Dificultades que yo tuve:

- **Refinar los parámetros**

- **Agregar stopwords extra (como nombres propios) pero no en la primera fase.**

163	53 yes yes, yes, yes ah, ah yes, ah				

Conclusiones:

- Hay una brecha numérica consistente y estructural - Solo el 27% de los personajes son femeninos, frente al 69-70% masculinos — una proporción de 1 mujer por cada 3 hombres, prácticamente idéntica ya sea que cuentes personajes o palabras de diálogo.
- La brecha no es exclusiva del guion — se repite en la dirección y guion
- Los diálogos femeninos se concentran fuertemente en "Familia y vínculos" (41.1%) y "Cuerpo, salud y emoción" (18.6%). Los diálogos masculinos están mucho más repartidos entre "Vida cotidiana", "Crimen, violencia y justicia", "Trabajo y dinero", "Ciencia y saber".
- Doble desigualdad: cuantitativa (menos personajes, menos directoras, menos guionistas femeninas) y cualitativa (cuando las mujeres sí tienen voz, esa voz se concentra en lo doméstico y emocional, mientras el discurso masculino domina los espacios de poder, conflicto y conocimiento)
